

For an unrivalled visitor's experience

GoPlanner Visitors is a system to DIGITALISE VISITORS MANAGEMENT and external user's access.

It saves time, simplifies procedures and puts you in control of the flow of your visitors.

It allows the management of different types of users whose specific fields can be managed in control and within an administration dashboard.

Access management for visitors by appointment

Access management for regular visitors

Access management for unexpected visitor

Benefits

GoPlanner brings immediate BENEFITS in terms of **speed, lay out and savings**

- It automates booking and visitors registration processes
- It allows all relevant records and documents to be managed digitally
- It enhances corporate image
- It reduces concierge management costs
- It allows reviewing reports on dwell times of external users

Visitor's Type

Showing 1-5 of 5 items.

#	ID	Description	
1	12	Guest	   
2	15	Customer	   
3	16	Consultant/Supplier	   
4	156	President	   
5	157	Executive Officer	   

Security and reports

- Transits are monitored in real time and recorded in detail
- The organiser may prevent access to certain areas and give a time limit to the badge
- Visits are tracked and there is a digital archive of the confirmation of acknowledgement and acceptance of the required documents

NO MORE PAPER SUPPORT

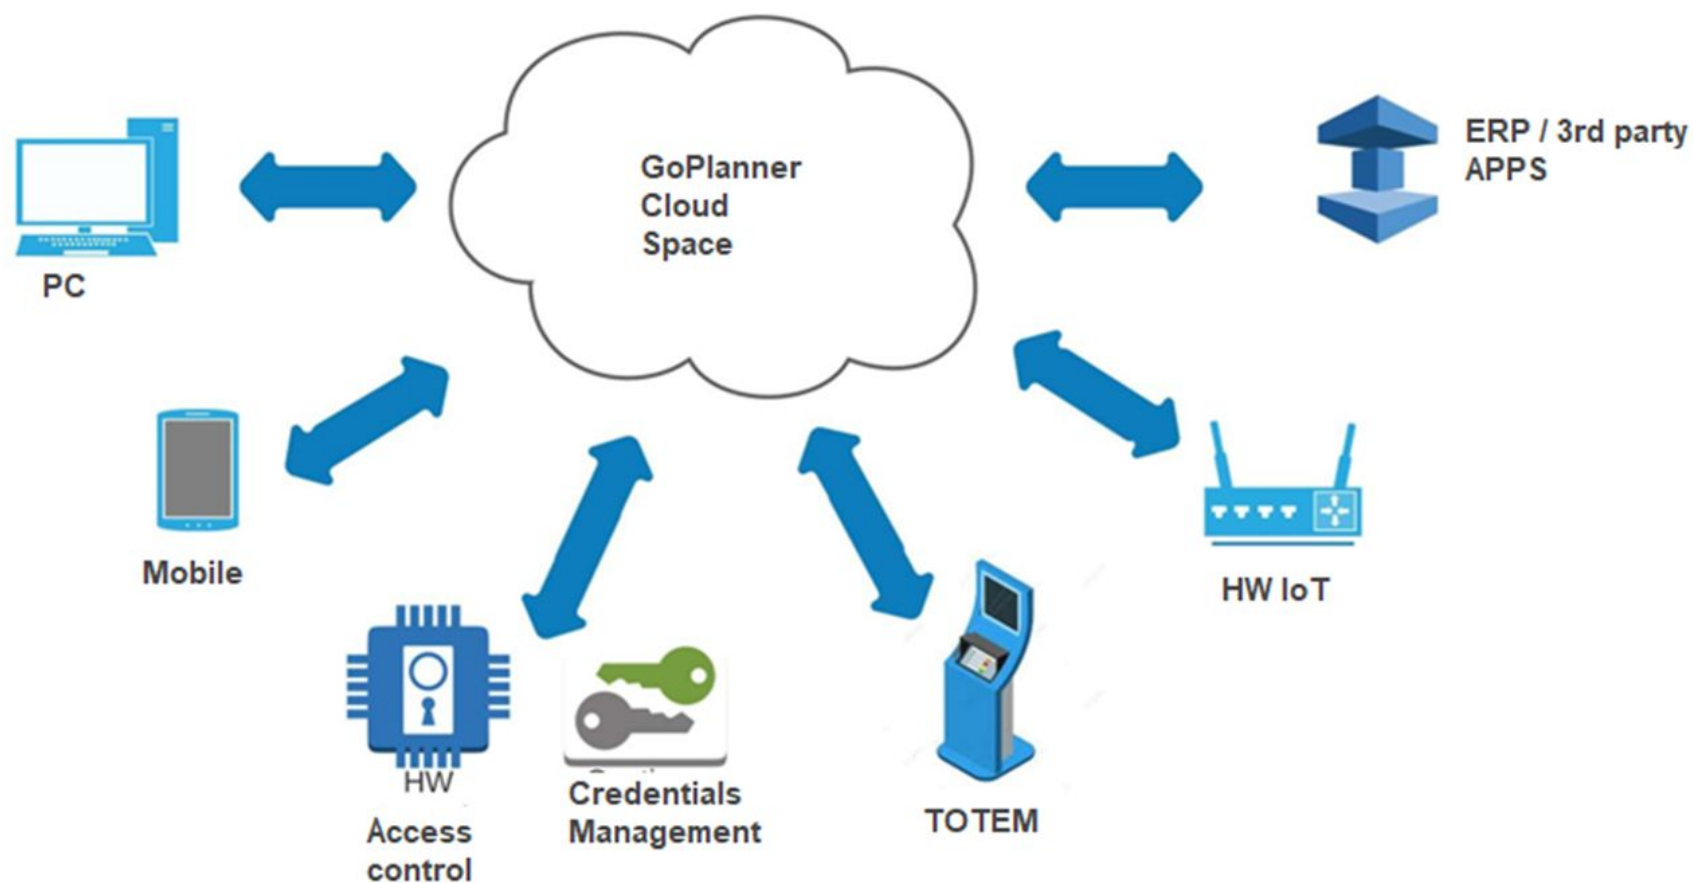

- There's no more need to print our documents for credit. Everything can be done directly from a mobile device, without wasting paper and without running the risk of forgetting documents
- The visit is recorded electronically
- Counter-signed documents of guests are stored digitally

VISITORS' SELF CHECK-IN

- It allows visitors' access to be organised and managed automatically, without the need for live presence
- The system is based on an application module and optionally a self-service totem can be provided for the distribution of cards or tickets with QR Code or RFID tags
